

小满智能 · 案例与交付

真正跑在生产环境里的 AI 系统

AI 智能体 · 工作流自动化 · 数据平台 · 交付全套源码 | xmbot.top

下面三个系统都已经**真实上线并在日常使用**（不是演示）：工厂生产管理系统、量化交易与数据分析平台、10 语企业官网。文末是完整的交付清单与流程。

一、工厂生产数据管理系统

面向制造业车间的生产数据平台：生产总览、产量趋势、员工计件、货品排行、订单进度与生产计划一整套打通，车间与办公室看同一份数据；配套安卓 APP 供车间随时查看。

真实界面 · 月桐服饰生产数据管理系统

模块	作用
生产总览	今日 / 本月 / 今年 / 累计的产量与金额，一屏看清
产量趋势	近 30 天走势、近 12 个月的产量与金额对比
员工计件	按员工与款式汇总件数、金额，点名字看明细
货品排行	哪些款式做得最多，一眼看出主力产品
订单进度	录入订单总量与交期，已生产进度自动统计
生产计划	记录下一阶段安排：做什么、做多少、什么时候
返工追溯 / 单价管理 / 工资表	质量问题回溯、计件单价维护、工资自动核算

二、量化交易与数据分析平台

价格行为评分引擎 + 实时结算 + 持仓复盘 + 风控一体化。行情数据实时接入、交易记录可回溯，每笔交易自动记录、标注并推送提醒，盈亏自动汇总成周报；账号与数据都在自己的服务器上。

真实界面 · 观澜量化

能力	说明
策略信号	多维度评分引擎，输出可解释的评分与方向
回测	历史数据全量重放，验证策略表现
实时结算	行情实时接入，盈亏自动统计
持仓复盘	进出场标注、K 线方向标记、多周期存档
风控	止损、回撤上限、持仓上限保护
周报	盈亏自动汇总成周报

三、10 语企业官网

中英阿日韩马来法德西俄十种语言一键切换，阿拉伯语自动切换右对齐排版；手机与宽屏自适应，含内嵌媒体播放器与互动展示。从设计、开发到部署全程自主维护。

真实界面 · xmbot.top（10 语）

四、交付内容

- 全套源码 + 交接文档（可自行维护或找他人接手）
- 部署上线：服务器环境、域名绑定、HTTPS 证书
- AI 接入：模型接口登记在你的名下，服务费直付服务商
- 手机端响应式：真机测试，微信内打开也正常
- 数据看板与自动报表：按需定制指标与推送
- 上线后 1 个月支持：修问题、调细节

五、交付流程

聊需求 → 出方案 → 开发 → 部署上线

不用你写代码，也不用你懂技术 —— 说清要什么就行。需求说清楚，剩下的交给我。

XMbot · Case Studies & Delivery

AI systems built to run in production

AI agents · automation · data platforms · full source code delivered | xmbot.top

The three systems below are **live and in daily use** — not demos: a factory production management system, a quant trading & analytics platform, and a 10-language corporate website. The delivery checklist and process follow.

1. Factory production management system

A production data platform for a manufacturing floor: output overview, trends, piece-rate payroll, product ranking, order progress and production planning in one place — the workshop and the office read the same data, with an Android app for the floor.

Real interface · Yuetong Apparel production data system

Module	What it does
Production overview	Today / month / year / all-time output and value on one screen
Output trends	Last 30 days and 12-month output & value comparison
Worker payroll	Piece counts and value by worker and style — click a name for detail
Product ranking	Which styles are produced most — best-sellers at a glance
Order progress	Enter order volume and due dates; progress calculated automatically
Production plan	Plan the next stage: what to make, how much, and when
Rework trace / unit price / wages	Quality traceability, piece-rate maintenance, automatic payroll

2. Quant trading & analytics platform

A price-action scoring engine with live settlement, position review and risk control. Market data streams in real time, trade history is fully traceable, every trade is logged, annotated and pushed as an alert, and P&L is compiled into automatic weekly reports — accounts and data stay on your own servers.

Real interface · Guanlan Quant

Capability	Details
Strategy signals	Multi-dimension scoring engine with explainable scores and direction
Backtesting	Full historical replay to validate strategy behaviour
Live settlement	Real-time market data with automatic P&L
Position review	Entry/exit annotations, candle direction marks, multi-timeframe archive
Risk control	Stop loss, drawdown limits, position caps
Weekly report	P&L compiled automatically into a weekly report

3. 10-language corporate website

Ten languages with one-click switching (Chinese, English, Arabic, Japanese, Korean, Malay, French, German, Spanish, Russian), automatic right-to-left layout for Arabic, responsive on mobile and widescreen, with an embedded media player and interactive showcase — designed, built and deployed in-house.

Real interface · xmbot.top (10 languages)

4. What you get

- **Full source code** + handover documentation (maintain it yourself or hand it to anyone)
- **Deployment:** server environment, domain binding, HTTPS certificate
- **AI integration:** model APIs registered in your name, billed directly by the provider
- **Mobile-responsive frontend**, tested on real devices including in-app browsers
- **Data dashboards & automated reports** — metrics and alerts tailored to your business
- **1-month support after launch** for fixes and fine-tuning

5. Delivery process

Requirements

Proposal

Build

Deploy

No coding and no technical background needed — just tell me what you want. Describe your needs clearly; leave the rest to me.
